# NFC card bamboo - 85,6 x 54 mm - NTAG213 - 180 byte - wood look - portrait format with slot | without print

## Product information

The NFC card made of bamboo with a wooden look is an alternative for anyone who values renewable raw materials. With the integrated NTAG213 chip, the card can be used in a variety of ways, e.g. for check-in functions, time recording, access control and marketing campaigns. It is also compatible with all NFC-enabled smartphones, making it easy to run various apps.

## Short description

- Bamboo material, rigid
- Format 85,6 x 54 mm
- Indoor use, limited outdoor use
- Ambient temperature from -25 to +70 degrees
- NXP NTAG213 (NTAG213) - 180 bytes (NDEF: 137 bytes)

## Product description

### NFC product

The wood-look NFC card is made of bamboo and has a format of 85,6 x 54 mm with a material thickness of 1,53 mm. This NFC card has a 15 x 3 mm slot in portrait format to which a lanyard can be easily attached. It has a smooth surface and fits easily into standard wallet compartments for cards thanks to its typical credit card format. The bamboo material of the card is rigid but not waterproof, which is why it is only suitable for outdoor use to a limited extent.

Please note: Our bamboo cards are a natural product. Slight variations in color, texture, thickness, or feel are due to the material and do not constitute a quality defect. Rather, they emphasize the uniqueness of each individual product.

### NFC chip

The NFC card made of bamboo is equipped with the original NXP NTAG213 and offers a cost-effective entry into the NTAG21x series. The NXP NTAG21x series impresses with the greatest possible compatibility, good performance and intelligent additional functions. The NTAG213 has a total capacity of 180 bytes (free memory 144 bytes), of which 137 bytes are usable memory in the NDEF. Each individual chip has a unique serial number (UID) consisting of 7 bytes (alphanumeric, 14 characters). The NFC chip can be written to up to 100,000 times and has a data retention period of 10 years. The NTAG213 has the UID ASCII mirror feature, with which the UID of the tag can be appended to the NDEF message, as well as an integrated NFC counter, which increases automatically when reading. Both functions are not activated by default. The NTAG213 is compatible with all NFC-enabled smartphones, the NFC21 tools and all ISO14443 end devices.

- Total capacity: 180 bytes
- Free memory: 144 bytes
- Usable memory NDEF: 137 bytes

## Product properties

<b>Product number</b>	17140
<b>Weight</b>	4,9 g
<b>Material thickness</b>	1,53 mm (T)
<b>Dimensions</b>	85 x 54 mm (W x H)
<b>Memory</b>	180 Byte (free: 144 Byte, NDEF: 137 Byte)
<b>Detail colour</b>	brown
<b>Frequency</b>	13.56 MHz
<b>Material</b>	Bamboo
<b>Chip</b>	NXP NTAG213
<b>Data transfer rates</b>	106 kbit/s
<b>Storage temperature</b>	Min -55°C - Max +125°C
<b>Colour category</b>	braun
<b>Chip standards / ISO Norm</b>	ISO 14 443-3 A, ISO 14 443-2 A
<b>Operating temperature</b>	Min -25°C - Max +70°C
<b>Data retention</b>	10 years
<b>Number of write operations</b>	100.000 times
<b>Product form</b>	rectangular
<b>Compatibility</b>	to NFC-enabled smartphones: 100%
<b>Antenna format</b>	35 mm
<b>Further links</b>	ntag
<b>Antenna</b>	Aluminium
<b>NFC Forum Type</b>	NFC Forum type 2

Type	Card
Adhesive layer	No
