

Product number: 68808UN1

# NFC Sticker PVC printed - 30 mm - NTAG213 - 180 Byte - white - with foam | printed on one side

## Product information

The white NFC PVC sticker has a foam layer and a 3M adhesive layer that adapts particularly well to uneven surfaces. The product is suitable for object protection or product identification, among other things.

## Short description

- PVC material, rigid, foam layer, 3M adhesive layer
- Not suitable for metallic/conductive surfaces
- Diameter: 30 mm
- Indoor and outdoor use
- Ambient temperature -25 to +70 degrees
- NXP NTAG213 (NTAG213) - 180 bytes (NDEF: 137 bytes)
- Printed on one side
- 4-color printable
- Print finish: satin

## Product description

### NFC product

The white NFC sticker is made of waterproof PVC and is therefore ideal for indoor and outdoor applications. With a diameter of 30 mm and a material thickness of 4.2 mm, the sticker is both compact and robust. Thanks to the foam layer, the sticker also adapts well to uneven surfaces. The 3M adhesive ensures good adhesion. The sticker's chipset is compatible with all common NFC-enabled smartphones.

### Print

Our products are printed using a process that offers high resolution, colour accuracy and durability. This makes it possible to display images in photorealistic quality or to print even tiny font sizes legibly. This environmentally friendly technology enables us to personalise your products on one or both sides and add logos, images, text or other designs from a wide range of colours. The applied colour layer is abrasion-resistant and resistant to water, sunlight and chemicals.

For your desired design, simply download our suitable [print template](#) and provide us with your desired print layout conveniently via our configurator.

## NFC chip

The white PVC sticker is equipped with the original NXP NTAG213 and offers a cost-effective entry into the NTAG21x series. The NXP NTAG21x series impresses with the greatest possible compatibility, good performance and intelligent additional functions. The NTAG213 has a total capacity of 180 bytes (free memory 144 bytes), of which 137 bytes are usable memory in the NDEF. Each individual chip has a unique serial number (UID) consisting of 7 bytes (alphanumeric, 14 characters). The NFC chip can be written to up to 100,000 times and has a data retention period of 10 years. The NTAG213 has the UID ASCII mirror feature, with which the UID of the tag can be appended to the NDEF message, as well as an integrated NFC counter, which increases automatically when reading. Both functions are not activated by default. The NTAG213 is compatible with all NFC-enabled smartphones, the NFC21 tools and all ISO14443 end devices.

- Total capacity: 180 bytes
- Free memory: 144 bytes
- Usable memory NDEF: 137 bytes

## Product properties

<b>Product number</b>	68808UN1
<b>Memory</b>	180 Byte (free: 144 Byte, NDEF: 137 Byte)
<b>Detail colour</b>	white
<b>Frequency</b>	13.56 MHz
<b>Chip</b>	NXP NTAG213
<b>Data transfer rates</b>	106 kbit/s
<b>Dimensions</b>	30 mm Ø
<b>Material</b>	PVC
<b>Storage temperature</b>	Min -55°C - Max +125°C
<b>Type</b>	Sticker
<b>Chip standards / ISO Norm</b>	ISO 14 443-3 A, ISO 14 443-2 A
<b>Operating temperature</b>	Min -25°C - Max +70°C
<b>Data retention</b>	10 years
<b>Number of write operations</b>	100.000 times
<b>Colour category</b>	white
<b>Product form</b>	round
<b>Compatibility</b>	to NFC-enabled smartphones: 100%
<b>Weight</b>	1 g
<b>Available colours</b>	white
