# NFC coin Bamboo - 23,3 mm - NTAG213 - 180 byte - wood look - shopping cart token | without print

Produktbild Cover

## Product information

The NFC coin made of bamboo with a wooden look is an alternative for anyone who values renewable raw materials. With the integrated NTAG213 chip, the coin can be used in a variety of ways, e.g. for check-in functions, time recording and access control. Due to its size, the coin can also be used as a shopping cart chip, which makes it particularly interesting for use in marketing campaigns.

## Short description

- Bamboo material, rigid, without adhesive layer
- Not suitable for metallic/conductive surfaces
- Diameter: 23,3 mm
- Indoor use, limited outdoor use
- Ambient temperature -25 to +70 degrees
- NXP NTAG213 (NTAG213) - 180 bytes (NDEF: 137 bytes)

## Product description

### NFC product

The bamboo NFC coin has a diameter of 23.3 mm and a material thickness of 2.2 mm, making it ideal as a shopping cart token. It is characterized by a smooth, high-quality surface. The natural wood look creates a visually appealing impression.

Please note: Our bamboo coins are a natural product. Slight variations in color, texture, thickness, or feel are due to the material and do not constitute a quality defect. Rather, they emphasize the uniqueness of each individual product.

### NFC chip

The NFC coin Bamboo is equipped with the original NXP NTAG213 and offers a cost-effective entry into the NTAG21x series. The NXP NTAG21x series impresses with the greatest possible compatibility, good performance and intelligent additional functions. The NTAG213 has a total capacity of 180 bytes (free memory 144 bytes), of which 137 bytes are usable memory in the NDEF. Each individual chip has a unique serial number (UID) consisting of 7 bytes (alphanumeric, 14 characters). The NFC chip can be written to up to 100,000 times and has a data retention period of 10 years. The NTAG213 has the UID ASCII mirror feature, with which the UID of the tag can be appended to the NDEF message, as well as an integrated NFC counter, which increases automatically when reading. Both functions are not activated by default. The NTAG213 is compatible with all NFC-enabled smartphones, the NFC21 tools and all ISO14443 end devices.

- Total capacity: 180 bytes
- Free memory: 144 bytes
- Usable memory NDEF: 137 bytes

## Product properties

<b>Product number</b>	17182
<b>Weight</b>	0,6 g
<b>Material thickness</b>	2,2 mm (T)
<b>Dimensions</b>	23,3 mm Ø
<b>Memory</b>	180 Byte (free: 144 Byte, NDEF: 137 Byte)
<b>Detail colour</b>	brown
<b>Frequency</b>	13.56 MHz
<b>Material</b>	Bamboo
<b>Chip</b>	NXP NTAG213
<b>Data transfer rates</b>	106 kbit/s
<b>Storage temperature</b>	Min -55°C - Max +125°C
<b>Type</b>	Coin
<b>Colour category</b>	braun
<b>Chip standards / ISO Norm</b>	ISO 14 443-3 A, ISO 14 443-2 A
<b>Operating temperature</b>	Min -25°C - Max +70°C
<b>Data retention</b>	10 years
<b>Number of write operations</b>	100.000 times
<b>Product form</b>	round
<b>Compatibility</b>	to NFC-enabled smartphones: 100%
