- 1 NFC tag with NTAG216 chip: 1 keyfob (blue)
- Extra: NFC card with link to our instructions

Product description

NFC product

With the NFC Starter Kit Small, we offer you the ideal introduction to the versatile world of NFC. This set enables you to quickly and easily discover and use the benefits of NFC technology for your everyday life. The set includes five carefully selected products containing the following chip types: NTAG213, NTAG215 and NTAG216. These chips offer different memory capacities so that you always have the right NFC tag to hand for every application. Included are an NFC card, two NFC stickers, an NFC magnet and an NFC fob - each in different colors so that the information stored on them is easier to distinguish. This means you can use the NFC tags in a wide variety of places. Whether you want to automate your home with smart devices, create shortcuts or simply share your favorite playlist quickly - with the Starter Kit Small you can implement your ideas effortlessly.

NFC chip

The NXP NTAG21x series impresses with the greatest possible compatibility, good performance and intelligent additional functions. Each individual chip has a unique serial number (UID) consisting of 7 bytes (alphanumeric, 14 characters). The NFC chips can be written to up to 100,000 times and have a data retention period of 10 years. The NTAG213, 215 and 216 chips have the UID ASCII mirror feature, with which the UID of the tag can be appended to the NDEF message, as well as an integrated NFC counter, which increases automatically when reading. Both functions are not activated by default. The NTAG chips included in the starter kit are compatible with all NFC-enabled smartphones, the NFC21 tools and all ISO14443 end devices.

	NTAG213	NTAG215	NTAG216
Total capacity	180 byte	540 byte	924 byte
Free memory	144 byte	504 byte	888 Byte
Usable memory NDEF	137 byte	480 byte	868 byte
