NFC Sticker On-Metal - 22 mm - NTAG213 - 180 Byte - grey with logo | grey

Product information

The grey PET sticker with a diameter of 22 mm is particularly suitable for the inventory of metallic objects due to the integrated NTAG213 chipset and the on-metal property. The sticker is also widely used in marketing campaigns where it needs to be applied to a metal surface.

Product description

NFC product

The surface material of the grey NFC sticker is made of PET. The material is therefore partially waterproof, so that the sticker can withstand moisture even in moderation. The sticker has a diameter of 22 mm and a material thickness of 0.55 mm. The 3M adhesive 467 MP 200 MP Adhesive gives the sticker a high adhesive strength. This NFC on-metal sticker is compatible with all NFC-enabled smartphones.

NFC chip

The self-adhesive PET sticker features the original NXP NTAG213 and offers a cost-effective entry into the NTAG21x series. The NXP NTAG21x series impresses with the greatest possible compatibility, good performance and intelligent additional functions. The NTAG213 has a total capacity of 180 bytes (free memory 144 bytes), thereof usable memory in the NDEF 137 bytes. Each individual chip has a unique serial number (UID) consisting of 7 bytes (alphanumeric, 14 characters). The NFC chip can be written up to 100,000 times and has a data retention of 10 years. The NTAG213 has the UID ASCII Mirror feature, which allows the tag's UID to be appended to the NDEF message, as well as an integrated NFC counter that automatically increments during readout. Both features are not enabled by default. The NTAG213 is

compatible with all NFC-enabled smartphones, the NFC21 tools and all ISO14443 terminals.
