Product description

NFC product

The black laundry tag is made of PPS, making it durable and waterproof. The laundry tag can be washed without any problems as it can withstand extreme temperatures (-20°C to 180°C), pressure and even chemicals. This item has a diameter of 20 mm and a height of 2.54 mm. This product is compatible with all NFC-enabled smartphones.

NFC chip

The PPS tag is equipped with the original NXP NTAG213 and offers a cost-effective entry into the NTAG21x series. The NXP NTAG21x series impresses with the greatest possible compatibility, good performance and intelligent additional functions. The NTAG213 has a total capacity of 180 bytes (free memory 144 bytes), of which usable memory in the NDEF is 137 bytes. Each individual chip has a unique serial number (UID) consisting of 7 bytes (alphanumeric, 14 characters). The NFC chip can be written up to 100,000 times and has a data retention of 10 years. The NTAG213 has the UID ASCII Mirror feature, which allows the tag's UID to be appended to the NDEF message, as well as an integrated NFC counter that automatically increments during readout. Both features are not enabled by default. The NTAG213 is compatible with all NFC-enabled smartphones, the NFC21 tools, and all ISO14443 terminals.
