NFC Sticker PET - 35 x 35 mm - NTAG213 - 180 Byte - square - white

Product information

The white NFC sticker is robust due to its PET material and its edge length of 35 mm is very eye-catching. The integrated NTAG213 chipset makes it particularly suitable for use in marketing campaigns (posters, brochures, etc.) and for identification purposes.

Product description

NFC product

The surface material of the white NFC sticker is made of PET. The material is therefore conditionally waterproof, so that the sticker can withstand moisture even in moderation. The sticker has a format of 35mm x 35mm and a material thickness of 0.20 mm. The antenna is easily visible from the outside, because the sticker is white. The chipset of the sticker is compatible with all current NFC-enabled smartphones.

NFC chip

The self-adhesive PET sticker is equipped with the original NXP NTAG213 and offers a cost-effective entry into the NTAG21x series. The NXP NTAG21x series impresses with the greatest possible compatibility, good performance and intelligent additional functions. The NTAG213 has a total capacity of 180 bytes (free memory 144 bytes), thereof usable memory in the NDEF 137 bytes. Each individual chip has a unique serial number (UID) consisting of 7 bytes (alphanumeric, 14 characters). The NFC chip can be written up to 100,000 times and has a data retention of 10 years. The NTAG213 has the UID ASCII Mirror feature, which allows the tag's UID to be appended to the NDEF message, as well as an integrated NFC counter that automatically increments during readout. Both features are not enabled by default. The NTAG213 is compatible with all NFC-enabled smartphones, the NFC21 tools and all ISO14443 terminals.
