

Product number: 68283

On-metal foil with 3M adhesive layer - 450 x 300 mm

Product information

The on-metal film or also called anti-metal film, you can use if you want to stick "normal" NFC tags (NFC products without previous on-metal coating) subsequently also on metallic surfaces. The on-metal film has an adhesive layer from 3M (3M 467 MP 200MP Adhesive), so you also create the usual adhesion with this film. The film is supplied in 450 x 300 mm format and can be cut to the desired size without hesitation.

Of course, we also offer [On-Metal stickers](#) for sale directly. You can find more of our [On-Metal products](#) here.

Product properties
