## Product description

### NFC product

The NFC tag is made of a robust and waterproof ABS material and has a format of 40 x 32 mm with a material thickness of 4.3 mm. Due to the integration of the MIFARE DESFire EV1 2k chipset, it is often used in industry in areas with high security requirements, for example in access control or for locking systems.

### Print

Our tags are printed using the modern digital UV direct printing process, which offers high resolution, color accuracy and durability. This makes it possible to display images in photo-realistic quality or to print even tiny font sizes legibly. This environmentally friendly technology allows us to personalize your products on one or both sides, adding logos, images, text or other designs from a wide range of colors.

The applied ink layer is abrasion resistant as well as resistant to water, sunlight and chemicals.

**Note:** Single-sided printing is included in the product price. A one-time setup fee will be charged additionally for setup of one-sided/two-sided printing.

You can add the printing of the tag via the configurator. You can find the suitable [print template for](#) printing a free motif here.

## NFC chip

The ABS tag is equipped with the original MIFARE DESFire EV1 2k (MF3ICD21). The MIFARE DESFire series is intended for the realization of applications with high security requirements and offers corresponding security functions, which enable the protected storage of data on the chip. The MIFARE DESFire EV1 2k has a total capacity of 2048 bytes, which can be used by up to 28 applications. The DESFire EV1 2k chip has a 7-byte UID. The NFC chip can be written up to 500,000 times and has a data retention of 10 years. The chip is Common Criteria (EAL4+) certified and offers 3-DES or AES128 compliant encryption, among other features. The MIFARE DESFire EV1 2k is compatible with all NFC-enabled terminals. Due to the special functions, special hardware (locking system) or software (app) is usually required for use. Feel free to contact us to clarify compatibility with your application.
