Product number: 68327

NFC & RFID card protective sleeve ? 90 x 60 mm ? grey | grey

Product information

Due to the material property, the shielding aluminum layer, this product is particularly suitable for protecting NFC credit cards or other NFC cards.

Short description

- Paper / Aluminium, rigid
- suitable for metallic/conductive surfaces
- size 90 x 60 mm, rectangular
- Indoor and outdoor use
- NFC Blocker

Application

Due to the material property, the shielding aluminium layer, this product is particularly suitable for protecting NFC credit cards or other NFC cards.

Product description

NFC product

This NFC card protection cover is made of GSM cardboard and a shielding aluminium layer. This means that cards in this protective cover cannot be read by NFC readers. The protective cover itself has a length of 90 mm and a width of 60 mm. It is therefore suitable for all common NFC cards (e.g. credit cards, EC cards) and also fits easily into standard wallet compartments. The protective cover is grey metallic on the outside and silver on the inside.

NFC chip

The NFC Credit Card Sleeve does not have an NFC chip itself.
