Product number: 69040

NFC e-Paper keyfob ABS - 1.54 Inch - 41 x 47 x 6.3 mm - White

Product information

With the NFC pendant e-Paper, small messages can be easily taken along and changed at any time. The pendant combines a 1.54 inch (39 mm) E-Ink display with NFC interface, via which new content can be transferred to the display. Content can be displayed in red, black, white and remains permanently visible without power supply - even in sunlight.

Content can be changed via Android or iPhone app. In this, a text is specified or an image is inserted and then transmitted to the display. In our How2s Describe NFC display with Android and Describe NFC display with iOS we show the process step by step. This process takes up to 8 seconds depending on the content and NFC smartphone. The pendant can be used e.g. as an everyday companion with a personal message on your bag, backpack or keychain.

Functions

- Powerless display of content
- Red/black/white display
- Update via NFC smartphone (Android and iOS)
- Update time approx. 8S
- 200x200 pixel resolution (184 DPI)
- Viewing angle > 170°
